

Education Committee

The Education Committee shall make available to our members classes which will enable them to complete the required continuing education and CORE requirements of the Kentucky Board of Auctioneers. The participation in and cost of said classes shall be closely monitored, to keep it a financially sound benefit for our membership and for the KAA.

The Education Committee will also make available to our membership classes which teach the latest polices and procedures currently being used by successful auctioneers . Since technology is the driving force of change in our industry, we would anticipate a major effort in this area.

All members of the Education Committee and board of directors shall be asked to prepare a report evaluating the classes and instructors of continuing education for that year. Said reports shall be used for consideration of classes to be taught the following years.

The Education Committee shall strive to make available to our membership educational opportunities which will assist them in our profession.
